

# Research Study for Primary Care Providers (PCPs)

This research study will explore how PCPs make decisions on recommending cervical cancer screening in women with Intellectual and developmental disabilities (I/DD).

- I/DD are disorders that occur prenatally, neonatally, or during the age of development and affect the trajectory of an individual's physical, intellectual and or emotional development. Examples of I/DD include Autism Spectrum Disorder and Down Syndrome.

## Are you eligible to participate?

- Must be a Primary Care Provider (PCP)
  - MD/DO or PA who lives and practices in the United States
- A specialty in one of the following areas:
  - OBGYN or Internal medicine
- Must speak English

## Participants will receive:

- A \$25 gift card for their participation

## Location and Time

### Commitment:

- One- on-one interviews will take place over Zoom
- Interviews will be scheduled to last one hour
